

Online Dialysis Peer Support Group

Great News!

Dialysis can be hard, especially when you're new to treatment. A lot of people who have been on dialysis for a while have told us they wish they could have spoken with a "veteran" patient to help answer questions when they were starting out. The Network is happy to announce a new online peer support group for individuals on dialysis. You may post questions on our group page, which will be answered by our roster of "dialysis experts," who are patients who have been on dialysis for several years. While this group won't answer questions that should be saved for your doctor and clinic care team, our experts use their experiences to offer information for you to make informed decisions.

INTERESTED?

Please contact your Network representative. They will tell you more about the group and answer questions.

WHO IS THE ESRD NETWORK?

We are contracted by the federal government (Centers for Medicare and Medicaid Services) to help improve the quality and safety of dialysis for all ESRD patients. We work with patients and clinic staff to try and make dialysis the best it can be for you and dialysis patients across the country. Please reach out to us with any questions about this support group or any concerns about your care.
