1. Patients who receive neuraxial anesthesia or have a documented reason for not administering pharmacological prophylaxis may pass the performance measure if either appropriate pharmacological or mechanical prophylaxis is ordered.	2. Current guidelines recommend postoperative Low Molecular Weight Heparin for Intracranial Surgery.	3. The U.S. Food and Drug Administration has approved Xarelto (Rivaroxaban) to reduce the risk of blood clots, deep vein thrombosis (DVT) and pulmonary embolism (PE) following knee or hip replacement surgery ONLY.	1.
