

Coordination of Care Across Settings

Nursing Home and Hospital Pressure Ulcer Quality Improvement Collaborative

Friday, November 6, 2009

10 a.m. to 3 p.m.

Providence St. Joseph Medical Center

OBJECTIVES

- Improve pressure ulcer care for Californians in nursing homes and hospitals through effective cross-setting coordination of care.
- Identify barriers and solutions to improve pressure ulcer care across the hospital and nursing home settings.
- Identify consistent ways to send and receive information regarding pressure ulcers across hospital and nursing home settings.
- Learn to use a standardized model for assessing pressure ulcer risk, staging wounds, and assessing skin to ensure consistency across settings.
