Q: What is the quarantine and testing guidance for residents?

- Per CDC guidance
https://www.cdc.gov/coronavirus/2019-ncov/hcp/long-term-care.html#anchor_1631031193599
 - **New admissions and residents who have left for > 24 hours**, regardless of vaccination status, should be tested on admission; and 5–7 days after admission.
 - **New admissions** that are **not up to date** with all recommended COVID-19 vaccine doses (including booster, if eligible) should be tested on admission and quarantined for at least 7 days from the date of admission until results are known for testing obtained 5–7 days after admission; ensure the resident remains asymptomatic before ending quarantine.
- **Scenario:** A new admission (not up to date with vaccinations) tested negative after 7 days and moved to the green zone. Two days later the resident developed symptoms and tested positive.
 - Why was quarantine time reduced from 14 to 7 days?
 - Can our facility extend quarantine time for new admissions to 14 days to be extra cautious?

HCP with Household Contact Example: Testing Guidance (regardless of vaccination status)

Q: Are HCP allowed to continue working if exposed to a household contact (e.g., exposed to positive child)

- If the HCP cannot isolate from their infected household member, the HCP would be considered exposed throughout the infected household member's infectious period.
- Per AFL 21-08.8, HCP up to date with vaccinations (including booster, if eligible) can continue working if exposed.
- HCP **not up to date** with vaccinations need to **quarantine** for a minimum of 7 days (need negative test to return) following the end of the exposure and cannot work unless there are critical staffing shortages.

Work Restrictions for Asymptomatic HCP with Exposures (Quarantine)

Vaccination Status	Routine	Critical Staffing Shortage
Boosted, OR Vaccinated but not booster-eligible	No work restriction with negative diagnostic test [†] upon identification and at 5-7 days	No work restriction with diagnostic test [†] upon identification and at 5-7 days
Unvaccinated [§] , OR Those that are vaccinated and booster-eligible but have not yet received their booster dose [§]	7 days with diagnostic test [†] upon identification and negative diagnostic test [†] within 48 hours prior to return	No work restriction with diagnostic test [†] upon identification and at 5-7 days
