Free COVID-19 antigen self tests via USPS

- Go to: covidtests.gov
- Each unique address eligible to receive 8 COVID-19 antigen tests
- **When will the test kit arrive?**
- Tests are typically sent out within 7 to 12 days of an order being successfully placed and are delivered by the USPS within one to 3 days of shipping.
- **Residents of Multi-Unit Buildings**
- In some limited cases, customers who live in a multi-unit building seeking to order COVID test kits may have difficulty placing their order because the Postal Service™ system does not recognize the address being entered as a single residence address within a multi-unit building, and another resident at that building address has already placed an order.
- If you believe you are running into this multi-family / multi-unit issue, you can file a service request at <https://email.usps.com/s/the-postal-store-inquiry> or call 1-800-ASK-USPS (1-800-275-8777) to appeal to get the issue fixed.
