

Customized Data for Quality Improvement

The HSAG Quality Improvement Innovation Portal (QIIP) is a data portal for hospitals participating in initiatives and activities with HSAG to achieve the Centers for Medicare & Medicaid Services (CMS) quality improvement areas of focus. The QIIP provides access to customized, facility-specific Medicare Fee-for-Service data reports that can be used to identify trends, measure the effectiveness of current strategies, and evaluate processes that need to be refined to achieve intended outcomes and optimize patient safety.

In the QIIP, your facility will be able to:

- Access and download performance reports and dashboards.
- Identify trends and target improvement efforts.
- Complete assessment forms to identify performance gaps.
- Gain insight to address health equity and disparities.

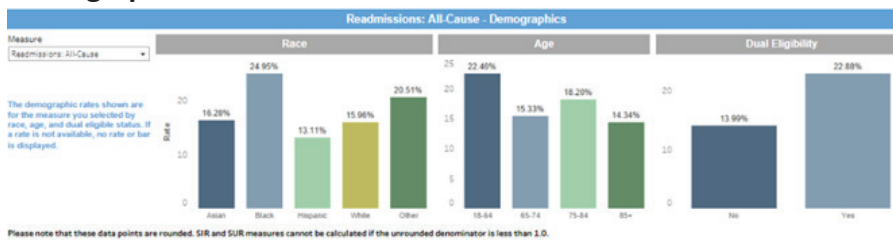

Reports include:
