

Dialysis SAFE ZONE

Ground Rules for Taking a Team Approach to a Safe Culture

In the Safe Zone:

- **All staff** should feel safe enough to freely and respectfully remind one another to follow infection control policies and procedures.
 - ! Titles, credentials, and level of education are irrelevant in the Safe Zone.
- **All patients** should feel safe enough to ask questions about the treatment they receive.
 - ! Every patient has the right to expect honest answers without fear of retaliation.
- There must always be **safety without judgement**.
